

Solar Parking Barrier Gate
 AKD613D

Parameters:

Appearance size	360*380*1060mm
Driving power	4 photovoltaic panels sunshine / two groups of 24V
Valid time	5000 times when fully charged
Charging time	5 hours fully charged
Remote control frequency	433 frequency band
Motor specifications	18 types of brushless motors for wall-mounted
Chassis material	Cold rolled steel
Remote control distance	10m to 50m
Controller	DC24V DC controller
Landing rod speed	adjustable from 2s to 6s

Features:

- Use time: It can be used about 10,000 times without continuous sunlight.
- Installation method: No need to use electricity, no wiring, just fix it and install it directly.
- Rich interfaces: remote video monitoring, wireless remote control switch, Bluetooth WIFI can be connected to a variety of access control identification systems at the same time.
